Software Engineer | Product & Mobile (React Native • Next.js)

Performance driven Software Engineer with 4+ years of experience specialized in building scalable mobile and web applications using **React Native**, **Next.js**, and **TypeScript**. Proven track record of taking complex, incomplete projects to production-ready states and optimizing system architectures for global performance. Passionate about bridging the gap between mechanical precision and software scalability.

WORK EXPERIENCE

Kittchens Meerge Africa   01/2026 - Present
Full Stack Developer • Contractor   Remote

Rescued and refactored a non-functional, incomplete **Next.js** codebase, transitioning the platform to a **high-availability production environment** with 100% operational uptime.

Engineered robust frontend and backend logic to ensure the platform could scale efficiently under increased user loads.

Partnered with backend teams to resolve critical API bottlenecks, ensuring **100% data flow accuracy** and system stability between client and server, a core requirement for high-stakes data environments.

Deployed key user-facing features with a strict focus on **latency reduction**, high responsiveness, and mobile-first performance.

Digitcan   02/2025 - 09/2025
Product Engineer (Mobile & AI) • Contractor   Remote

Designed and executed the full-stack architecture for **EdiQ**, an AI-integrated mobile companion app, ensuring a scalable foundation for rapid user growth

Managed the complete product lifecycle from initial wireframing to a high-impact waitlist launch, proving the "Clarity" required for remote product delivery.

Implemented complex state management and real-time AI workflows, achieving high responsiveness and seamless user interactions for a student-focused user base.

Bridged the gap between complex AI logic and user-centric design to deliver a "stress-relieving" and straightforward user experience.

TG Canada Cleaning Service   05/2024 - 10/2024
Frontend Web Developer • Contractor   Ontario, Canada (Remote)

Managed the end-to-end web platform for a North American professional services firm, ensuring high-performance delivery across time zones.

Architected a high-responsiveness client-booking interface and a complex worker dashboard using **React.js** and **Firebase**.

Streamlined service management and logistics by building a centralized, **reliable** dashboard that significantly improved user experience (UX) for both clients and staff.

Leveraged Firebase to ensure real-time, **scalable** data synchronization between the service-side operations and client-side bookings.

Digitcan   06/2022 - 03/2024
Software Engineer • Contractor   Remote

Engineered a high-performance SEO automation engine using modern JavaScript frameworks, resulting in a measurable increase in Google Search rankings and organic traffic for client platforms.

Architected and deployed **scalable** web solutions, including e-commerce platforms and interactive dashboards, using **React.js** and **Firebase**

Maintained **99.9% uptime** for all deployed client solutions through optimized cloud hosting, proactive monitoring, and robust system architecture.

Managed the end-to-end development lifecycle for diverse digital products, ensuring high-performance delivery and "straightforward" user experiences for professional clients.

EDUCATION

B.Eng. in Mechanical Engineering
Lagos State University of Science and Technology   Ikorodu, Lagos, NGA • 01/2022 - 01/2027

in Software Engineering
Panthera Tech School   Lagos, Nigeria • 11/2020 - 04/2021

PUBLICATIONS

Google Firebase in React
Medium (via Samuel Bankole's Blog)

Authored a comprehensive guide on integrating Authentication, Database, and API connectivity, reaching a global developer audience.

SKILLS

Languages: CSS3., HTML5, JavaScript (ES6+), TypeScript

Frameworks/Libraries: Next.js, Node.js, React.js, React Native, Tailwind CSS.

Backend/Tools: Firebase, Git., PostgreSQL, RESTful APIs, Supabase

Engineering: SEO Automation, Systems Architecture, UI/UX Implementation
